

At Main Street Elementary School, we believe:

our students are entitled to a highly challenging curriculum developed to meet their needs.

that successful school-community partnerships are needed to guarantee we acquire the necessary resources in order for our students to reach the highest levels of student achievement;

in fostering a climate of collaboration, communication and compassion for each individual within the MSE community;

in the right of every individual to be nurtured, encouraged and challenged in the pursuit of his or her dreams and aspirations; and

in school-wide collaboration and that all policies, programs, procedures, and decisions must be measured against, “Are we doing what’s right today for a better tomorrow?”
